

Anmol Kumar

Senior .Net Developer

09211352231

anmchaudhary@gmail.com

<https://www.linkedin.com/in/anmchaudhary1996/>

- **5+ Years expertise in Microsoft Technologies like C#, ASP.NET, Ajax, Web Services, SQL Server 2000/2008 and Windows Service.**
- Experience in **VB/C#** in doing backend development.
- Experience in **ASP.net** including **Master Pages, Web User Controls, Web Services, Caching, Ajax Control Toolkit, VB.net, and Web Forms** Experience in **ASP.Net**.
- Exposure to **.Net 3.0/3.5/4.0/4.5/5 Framework, WEB API, Microsoft Azure, AWS, Xamarin Forms and Entity framework with Web Forms**
- Exposure to **RAZOR, MVC, Bootstrap, AJAX, JSON**
- Knowledge of **IIS, MS AZURE, Microservices**

TECHNICAL SKILLS

- **Visual Dev Tools:** MS Visual Studio 2017/19 Developer (Open Source .Net Development IDE)
- **Languages/Framework:** VB, ASP.Net, C#, AJAX, LINQ, Web Forms, **MVC, .Net Core**
- **Scripting Languages:** JavaScript, JQuery
- **Relational Database:** SQL Server 2008/2016, MS Access
- **Reporting Tools:** Exposure to SQL Server, Microsoft Word
- **Version Control System:** Team Foundation Server& SVN, Git, .Bitbucket
- **Web Technologies:** HTML, DHTML, CSS, XML, CSS3, HTML5, Bootstrap
- **Mobile Technologies:** Xamarin, C#, Xaml, SqlLite
- **Automation:** Selenium with c#
- **Front -End technology:** **Angular 12+, React Js**

EDUCATION QUALIFICATION:

EXAMINATION	BOARD /UNIVERSITY	SCHOOL /COLLEGE	YEAR
MCA	IGNOU	Universal Institute of Computer and Technology	2019
BCA	Magadh University	MSY College Gaya	2016
Intermediate Examination	BSEB Board	CBLK College Bariarpur Munger	2013
High School Examination	BSEB Board	Philips High School Bariarpur Munger	2011

EXPERIENCE

Closeloop Technologies	Software Engineer	June 2025 to Nov 2025
Sterling	Software Engineer	Feb 2024 to Oct 2024
Softgigs Solutions	Senior Software Engineer	March 2020 to Feb 2024

Responsibilities: -

Design, Analysis, Application trouble shooting, Technical Support onsite/offsite and development of Projects

Accomplishment:

Completed projects for various clients delivered on schedule.

Projects:

LastPass

Client: LastPass (June 2025 -Nov 2025)

Team Size: 20

URL: <https://www.lastpass.com/>

LastPass is a popular identity and password management company, offering secure storage and autofill for credentials for individuals, families, and businesses, led by CEO Karim Toubba, known for its encrypted password vault and features like passkey support, though it's faced security challenges

Roles and Responsibilities:

- Requirement gathering and design of the application.
- Worked on migrating third party library
- Deployment of the project in different environment
- Worked on all different projects/platform for the current application.
- Change some processes with the new implementation in the current project

Environment: Visual Studio 2024, WEB API .SQL Server 2016.Net Core,Linq,

Sterling Check

Client: Sterling Check (Feb 2024 -Oct 2024)

Team Size: 50

URL: <https://www.sterlingcheck.com/>

a major global background screening company that helps employers verify candidates' work history, education, criminal records, and credentials to ensure safe hiring, offering services like employment verification, criminal record checks (national & local), and identity verification, with processes ranging from quick digital checks to in-person ID verification

Roles and Responsibilities:

- Conducted requirement analysis and contributed to application design.
- Managed migration of third-party libraries to ensure compatibility and stability.
- Executed project deployments across multiple environments.
- Collaborated on diverse projects and platforms within the current application ecosystem.
- Implemented process improvements through new project enhancements.

Environment: AWS,Visual Studio 2024, WEB API .WebForm,SQL Server 2016.Net Core,Linq,

Security System

Client:Kastle System (March 2020 -Feb 2024)

Team Size: 50

URL <https://www.kastle.com/>

Company has been leading the security industry since 1972 with advanced managed security solutions and services, protecting the who's who of commercial real estate, multifamily communities distinguished global retail brands, leading global enterprises, educational institutions, and critical government facilities.

Roles and Responsibilities(Microservices Migration Experience):

- Requirement gathering and design of the application.
- Worked on the new feature and functionality
- Worked on current bugs and improvement in system.
- Deployment of the project in different environment
- Worked on all different projects/platform for the current application.
- Change some processes with the new implementation in the current project
- Designed and implemented independent services such as **Personnel, Card, Email, and Visitor**, ensuring clear separation of concerns.
- Developed RESTful APIs for inter-service communication, improving scalability and maintainability.
- Enabled independent deployment and scaling of services, reducing downtime and improving performance.
- Utilized **Redis cache** for storing card details, enhancing quick retrieval and reducing database load.
- Integrated **AWS CloudWatch** for storing and monitoring logs, improving observability and troubleshooting.
- Used **AWS S3 bucket** for storing and managing images securely and efficiently.
- Implemented **SQL queries for audit logging and storage**, ensuring traceability and compliance across services.
- Created reusable **Angular components** to enhance UI modularity and maintainability.
- Performed **UI manipulations** by adding new fields in existing screens and ensuring seamless integration with backend services.
- Extended UI functionality by adding **additional properties/fields from backend APIs**, improving user experience and data visibility.

Environment: Visual Studio 2019, Bootstrap, HTML5,, MVC, WEB API .SQL Server 2014,Angular 12,ASP.Net Webform .Net Core, Microservices,Azure and AWS

DSB Transport

Client: Tochi Interprise (March 2022 -Dec 2023)

Team Size: 1

URL:<https://www.dsbtransport.com/>

DSB Transport consistently provides excellent services for a variety of railroad crews. drivers strive to provide our clients with the most comfortable, reliable and safe transportation possible

Roles and Responsibilities:

- Requirement gathering and design of the application
- Implemented Business Components and Data Layer Components using Microsoft Patterns in C#
- Implemented Base Classes and Components, Concurrency Management and Exception Management using C#.
- Participated in designing of solutions and identification of technologies to uses.
- Design of various service interfaces along with concurrency and security
- Design the base class to import data from Microsoft Project Plan and migrating system data to Microsoft Project Plan.
- Participation in database design.
- Design WEB API services
- Form Based Authentication, Filters and Validations.

Environment: Visual Studio 2015, bootstrap UI JS, Bootstrap, HTML5,, MVC,.Net Core WEB API .SQL Server 2014

Phoenix Client: EnelX

Team Size: 35

URL: Not available

Enel X Global Retail is the Enel Group's global business line operating in the field of energy supply and energy management services, with a portfolio of products and value-added services to incentivize more independent and sustainable energy use

Roles and Responsibilities:

- Developed Excel bulk upload functionality, streamlining large-scale data entry and improving operational efficiency for energy management workflows.
- Implemented background jobs for automated mailing, ensuring timely communication and reducing manual overhead in customer engagement processes.
- Designed and implemented innovative energy management features, expanding the product portfolio and enabling smarter, more independent energy use.
- Enhanced system stability and performance by troubleshooting and resolving critical issues, improving reliability for global retail operations.
- Collaborated across diverse projects and platforms, integrating solutions into the broader Enel Group ecosystem to deliver value-added services.

Environment: Visual Studio 2022, Bootstrap, React, WEB API .SQL Server 2019, React Js 18 ,ASP.Net Core , AWS, Google API and Other third-party library

TalaCall Client:

TalaCall Team

Size: 5

TalaCall is a hospital administration tool for health care professionals. TalaCall can manage Physician's On Call Operations. Administrators can schedule physician on call timing and can manage and track their active calls.

Roles and Responsibilities:

- Requirement gathering and design of the application.
- Implemented Business Components and Data Layer Components using Microsoft Patterns in C#
- Implemented Base Classes and Components, Concurrency Management and Exception Management using C#.
- Participated in designing of solutions and identification of technologies to uses.
- Design of various service interfaces along with concurrency and security
- Design the base class to import data from Microsoft Project Plan and migrating system data to Microsoft Project Plan.
- Participation in database design.
- Design WEB API services
- Form Based Authentication, Filters and Validations.

Environment: Visual Studio 2015, bootstrap UI JS, Bootstrap, HTML5, Asp.Net, XML, MVC, WEB API .SQL Server 2008R2

CoreLogistic Team Size: 5

Url: <https://www.corelogistic.com/>

Core Logistic Private Limited is a leading name in the Warehousing and Logistics Services in INDIA, with our prime focus on Telecommunication Industry, Warehouse Management, Inventory Management, Order Fulfilment and Forward Service (Direct to the final destination) is the CORE business function of Core Logistic Pvt. Ltd.

Roles and Responsibilities:

- Requirement gathering and design of the application.
- Implemented Business Components and Data Layer Components using Microsoft Patterns in C#
- Implemented Base Classes and Components, Concurrency Management and Exception Management using C#.
- Participated in designing of solutions and identification of technologies to uses.
- Design of various service interfaces along with concurrency and security
- Design the base class to import data from Microsoft Project Plan and migrating system data to Microsoft Project Plan.
- Participation in database design.

Environment: Visual Studio 2015, bootstrap UI, Bootstrap, HTML5, Asp.Net, Xml, FileZilla, VB.Net, Ado.Net

Sports Perpetual

Client: Iain Stamp

Team Size: 5

URL: <http://www.sportsperpetual.com/>

Sports perpetual is a fully automated betting software(bot) that place bets automatically on users behalf .there is no need of human interference to place bet .It consist of Web and console application where we have can have detailed report ie. profit and loss against the bet placed

Roles and Responsibilities:

- Requirement gathering and design of the application.
- Implemented Business Components and Data Layer Components using Microsoft Patterns in C#
- Participated in designing of solutions and identification of technologies to uses.
- Design of various service interfaces along with concurrency and security
- Analysis report for ratio of investment and the profit
- Integration of the third party tool for getting bet prediction
- Conversion of the actual data with respect to the data getting from the third party for placing bet .

Environment: Visual Studio 2017, Bootstrap UI, HTML5, Entity Framework, XML, SQL Server , TFS,Windows services ,Selenium with C#

Health Secure

Team Size: 10

Health Secure can help your jail improve safety, reduce liability, contain costs and maintain an efficient, highmorale medical environment.

Roles and Responsibilities:

- Requirement gathering and design of the application.
- Participation in database design.
- Design WEB API services
- Form Based Authentication, Filters and Validations.
- Google Maps and Calendar implementation
- Team member responsible for coding of calculations and prompts for the report and report development according to the end-user specifications.
- Version control of the new and enhancement reports on GIT.
- Prepared design & technical document for the reports.

Environment: Visual Studio 2015, Bootstrap UI, ASP. Net, C#, SQL Server 2012, Entity Framework, LINQ
